After discussions with Staff of the Department of Public Service, the Company proposes the following revisions to the Company's July 22, 2014 tariff filing in the above-referenced matter:

1. Revise Service Classification No. 1B-DG - Residential Distributed Generation Service ("SC 1B-DG"), Service Classification No. 4A - High Load Factor Service ("SC 4A"), Service Classification No. 6 - Temperature Controlled Service ("SC 6"), and Service Classification No. 21 - Baseload Distributed Generation Sales Service ("SC 21") to allow customers to supply electricity they generate to the local electric utility.

2. Clarify that SC 21 is applicable to distributed generation customers and remove the requirement that customers certify that they are using qualifying cogeneration equipment.
3. Include a new pricing provision to cap the overall transportation rate charged to customers taking service under Service Classification No. 20 - Non-Core Transportation Service for Electric Generation ("SC 20") and Service Classification No. 18 - Non-Core Transportation Service ("SC 18") to no greater than the otherwise applicable interruptible transportation rate. The Company proposes to reduce the Value Added Charge to the extent necessary to remain within the cap.
