RE: Case No. 16-E-0226 - Tariff Filing by Orange and Rockland Utilities, Inc. to Update Service Classification No. 4 – Public Street Lighting – Company Owned – to Incorporate LED Options Contained in P.S.C. No. 3 - Electricity.

Dear Secretary Burgess:

Orange and Rockland Utilities, Inc. ("O&R" or the "Company") hereby submits for filing certain tariff leaves reflecting revisions to its Schedule for Electric Service, P.S.C. No. 3 – ELECTRICITY ("Electric Tariff").

This filing is made in compliance with the Commission's Order Approving Tariff Amendments with Modifications, issued March 10, 2017, in the above-referenced proceeding ("March Order"). The revised tariff leaves, set forth below, make changes to Service Classification ("SC") No. 4 – Public Street Lighting – Company Owned. These leaves are issued March 27, 2017, to become effective on April 1, 2017.

8th	Revised Leaf No.	283
	Original Leaf No.	283.1
7th	Revised Leaf No.	284
5th	Revised Leaf No.	286
	Original Leaf No.	286.1
3rd	Revised Leaf No.	287

These tariff leaves reflect the following modifications in accordance with the March Order.

1. The Company's inventory of the two LED luminaire options currently offered in the Electric Tariff: the 5,890 Lumen - 74 Watt LED and the 9,365 Lumen – 101 Watt LED, has been exhausted and these luminaires are no longer manufactured. Therefore, the Company has moved these luminaires from Leaf 283 to Leaf 284 under the section for luminaires no longer being installed by the Company. The Company has also revised the delivery charges for these two luminaires to reflect the new charges listed in Appendix B of the March Order.

Honorable Kathleen H. Burgess

March 27, 2017

2. Leaf 283.1 was added to the Electric Tariff to reflect the six newly approved LED street lighting luminaires under SC No. 4 and their respective delivery charges as listed in Appendix B of the March Order.
3. Leaf 286 was revised with language clarifying changes relating to the two percent system wide threshold¹ ("Two Percent System Threshold"). Commencing April 1, 2017, all replacements made under the Two Percent System Threshold will apply only to LED luminaire conversions. The Company will allocate a portion of the Two Percent System Threshold to each customer that requests replacements based on the quantity of existing non-LED street lighting luminaires in each customer's lighting district.
4. Leaf 286.1 was added to the Electric Tariff to reflect the following changes:
 - The Company shall not be required to replace more than two percent of the luminaires in any lighting district in any one year with LED luminaires unless the customer pays to the Company a replacement charge equal to the average undepreciated book cost per fixture.
 - Each customer seeking to convert to LED luminaires above its allocation of the Two Percent System Threshold allocation must notify the Company annually of the number of non-LED luminaires it seeks to convert.
 - The maximum amount of system wide LED luminaire conversions the Company is required to complete in any year will not exceed 20 percent ("Maximum Percentage") of non-LED street lighting luminaires on the Company's existing system.
 - Deadlines have been established for customers to send notification the Company of requested conversions for the remainder of 2017 and subsequent years. For calendar year 2017 only, customers wishing to participate must notify the Company, by July 1, 2017, in writing, of the quantity, location, and types of LED luminaires it would like installed. The Company will send a letter to eligible customers to notify them of the deadline and options for replacement under or above the Two Percent System Threshold. For 2018 and subsequent years, customers wishing to participate must notify the Company, in writing by November 1 preceding each year of the quantity, location, and types of LED luminaires it would like installed in the subsequent year. The scheduling of replacements for all of the above will be at the Company's sole discretion.
5. On Leaf 287, paragraph (F), language was added specifying that, commencing April 1, 2017, all failed luminaires under SC 4 requiring replacement shall be converted to LED luminaires at no cost to the customer provided customer consent has been previously received. Language was also added to revise the Company's obligation for repairing or replacing obsolete luminaires. The Company will remove the obsolete luminaire or, at the customer's request, replace it with an LED luminaire offered for service at that time for which the customer will be charged the appropriate tariffed rates.

¹ Established in the Order Adopting Terms of Joint Proposal, with Modifications, and Establishing Electric Rate Plan, Effective June 15, 2012 in Case 11-E-0408.

Conclusion and Notice

As directed by the March Order, the Company is filing these tariff amendments to become effective April 1, 2017. Pursuant to Ordering Clause 5 of the Order, the requirement for newspaper publication is waived.

Any questions regarding this filing can be directed to Cheryl Ruggiero at (212) 460-3189.

Very truly yours,

/s/
