More specifically, the Companies are updating the tariff leaves to include definitions for the terms, "Application," "Network," "Performance Factor," and "Performance Payment." Additionally, the Companies have added a section to the tariff leaves to identify emission requirements for electric-generating equipment that participate in the Term-Dynamic Load Management and Auto-Dynamic Load Management Programs. Finally, the Companies have added a section to the tariff leaves to identify further restrictions that apply to the Term-Dynamic Load Management and Auto-Dynamic Load Management Programs to clarify that a customer that receives payment for energy under other demand response programs, or qualified for Demand Reduction Value (DRV) or Locational System Relief Value (LSRV) compensation under the Value Stack, that customer will not also receive payment under the Term and Auto-Dynamic Load Management Programs.

Newspaper Publication

The Company respectfully requests a waiver of the newspaper publication requirement of PSL § 66-12 and 16 NYCRR § 720.8 as the revisions are clarifying in nature.
