commencing three months prior to the applicable calendar year. Ordering Clause 4 also provides that “[a]ny over- or under-collections shall be trued up on an annual basis.”

NYSEG began the reconciliation by verifying the amount of revenues the Company collected from October 1, 2005 through July 31, 2007. Subsequently, the Company estimated the amount of revenues the Company will collect from customers for the months of August and September 2007, the remaining months of the twelve month collection period. The Company has projected that it will over-collect \$274,809 for the period October 1, 2006 through September 30, 2007.

To calculate the 2008 RPS rate, the projected over-collection of \$274,809 was subtracted from the 2008 annual RPS target collection amount of \$7,774,090, resulting in a 2008 collection requirement of \$7,499,281¹. That amount was then divided by the kWh sales forecast for 2008, resulting in a RPS surcharge of \$0.0005 per kWh to become effective October 1, 2007. This surcharge amount is reflected in the attached proposed tariff leaves.

An analysis of actual surcharge amounts over- or under-collected in 2007 will be completed and the results of that calculation will be included in the surcharge calculation for 2009. This approach will continue to provide the customer with an RPS surcharge that does not change during the twelve month period.

Per Ordering Clause 7 of the Order, the requirements of Section 66(12) (b) of the Public Service Law as to newspaper publication of the changes proposed by this filing is waived.
