Summary of Tariff Modifications

On October 1, 2007, the Company filed amendments to its Gas Tariff to implement a mandatory capacity release program in compliance with the Order. By this

filing, the Company is proposing further tariff amendments to its Mandatory Capacity Release Service Program to reflect that in some cases the Company releases capacity directly to a Marketer's Agent or Designee ("Agent") rather than to the Marketer. The Company is also making minor "housekeeping" changes by (i) adding the word "Mandatory" on tariff leaf Nos. 390, 390.1, 390.2, 390.3, 390.4 and 390.5 and (ii) clarifying on leaf No. 390 the procedure for execution by a Marketer and, if applicable, its Agent of the required Capacity Release Service Agreement.

There are circumstances where a Marketer ("Capacity Release Seller") elects or needs to have its allocated share of upstream pipeline capacity released by the Company directly to an Agent. (In such circumstances, the Company will require both the Marketer and the Agent to sign the Capacity Release Service Agreement obligating them to be bound by the terms and conditions set forth in the Gas Tariff and the Agreement.) For this reason, the Company has revised the above-listed leaves to accommodate the circumstance where, as part of the Mandatory Capacity Release Service Program, capacity is released by the Company directly to a Marketer's Agent rather than to a Marketer.

The Company will make applicable changes to its Gas Transportation Operating Procedures Manual ("GTOP") upon Commission approval of the proposed tariff changes on a permanent basis.

Notices

The Company respectfully requests that the requirement for newspaper publication of the changes proposed herein be waived in its entirety since notice of the changes will be sent to the affected Sellers and to all parties on the official service list and the changes will go into effect on a temporary basis.

Questions regarding this filing may be directed to me at (212) 460-3325.

Very truly yours,

Christine Colletti
Director – Rate Engineering
