RE: CASE 04-E-0917 - Proceeding on Motion of the Commission as to Metering Configurations for the Net Metering of Residential Photovoltaic and Farm Waste Customer-generators

CASE 04-E-0546 - Proceeding on Motion of the Commission as to Net Metering Special Provisions Within S.C. No. 1 – Residential Service and S.C. No. 6 – Residential Time-of-Use Service of Hudson Gas & Electric Corporation.

Dear Secretary Brillling:

Rochester Gas and Electric Corporation (“RG&E” or “Company”) is hereby filing the following tariff leaves to become effective May 29, 2005, in compliance with the New York State Public Service Commission’s (“Commission”) Order Adopting Net Metering Tariff Provisions and Requiring Additional Filings (“December 15 Order”), issued and effective December 15, 2004 in the above referenced proceedings. This filing is also made in accordance with Appendix 7-H (electronic tariff filing system) to the Commission's Codes, Rules and Regulations (16 NYCRR Appendix 7-H).

In accordance with Ordering Clause No. 4, RG&E is providing additional metering options for the net metering of Time-of-Use (TOU) PV residential customers and TOU farm waste customers.

More specifically, a TOU PV residential customer may request the Company to install, at the customer’s expense, a second TOU meter to measure the excess electricity generated by the customer’s generator. This metering option is currently available to TOU farm waste customers. In addition to the dual TOU metering configuration, TOU PV customers and non-demand billed TOU farm waste customers may select a single TOU meter with bi-directional capabilities. Demand-billed farm waste customers remain ineligible for single metering.

The incremental costs of implementing the additional metering options will be deferred in accordance with Section XII.1 of RG&E’s March 9, 2004 Electric Rate Joint Proposal.

The Company requests that the requirement of § 66(12)(b) of the Public Service Law and 16 NYCRR §720-8.1 as to newspaper publication be waived because existing TOU PV residential customers and TOU farm waste customers affected by these tariff changes will be notified directly and new customers will be advised when they enter into interconnection agreements with the Company.

Hon. Jaclyn A. Brillling
