PSC No. 3 – GAS

Effective October 1, 2004

By this filing the company proposes to establish a new firm service applicable to residential distributed generation customers. Service Classification No. 11 will contain the rates, terms and

conditions applicable to the sale of natural gas and the transportation of supplies to customers who qualify for service under this Service Classification.

Service under this Classification will be available to customers with a minimum load factor of fifty (50) percent.

Sales or Transportation Service

S.C. No. 11 customers will have the option of purchasing their natural gas supplies from either St. Lawrence Gas or a retail supplier. Natural gas supplies will be sold to residential distributed generation customers by St. Lawrence Gas at the Monthly Cost of Gas filed with the Public Service Commission.

Customers purchasing their supplies from a Retail Supplier must use firm, non-recallable, primary delivery point capacity to the Company's citygate(s) during the months from November to March.

Rate Design

The rates proposed by the company in this filing are based on the company's Embedded Cost of Service Study filed September 30, 2002 in Case 02-G-1275 – Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of St. Lawrence Gas Company, Inc. for Gas Service. The rates are established as a ceiling for not less than three years. Rates are designed using an average class load factor of 50%. The rate design includes a Customer Charge and a volumetric rate.

Metering

Customers are not required to have separate metering under this Service Classification.

The requirement of Section 66(12) (b) of the Public Service Law as to newspaper publication of the amendments directed in this order are waived.
