Re: Tariff Revision-Village of Springville

Dear Secretary Brillling:

The Village of Springville is proposing a Tariff revision to add two new fixtures to Service Classification No.6 – Private Outdoor Lighting. The need for the addition is that the current 175 Watt Mercury lights are being phased out and will eventually be replaced by either the 70 Watt Metal Halide or the 150 Watt Metal Halide.

I have enclosed the proposed changes for Leaf 13, Revision 4. We are looking for an effective date of the change to be July 1, 2011. The Village of Springville is also requesting a waiver of newspaper publication of this revision.

Please contact me at (716) 592-4936 if further information is needed.

Respectfully Submitted,
Dawn M. Simmons
For The Village of Springville
